Cc: Marouchko, Irina; dmowat@scugogfirstnation.com
Subject: FW: Notice of On-line Public Information Centre #1 - Claremont Drainage Plan, City of Pickering
Attachments: Notice of On-line PIC#1-Claremont Drainage.pdf

Good afternoon Chief Kelly LaRocca,

The City of Pickering is undertaking a Municipal Class Environmental Assessment for the Claremont Drainage Plan. We originally reached out to Mississaugas of Scugog Island First Nation on February 21, 2017. Following a large rain event in June 2017, The City set aside the overall Claremont Drainage Plan to assess site specific risks in the Study Area. The City resumed work on the Claremont Drainage Plan in late summer 2020.

A Study Notice describing this is available on the City's website: <https://www.pickering.ca/en/city-hall/resources/CDP-Notice-of-Study-Status.pdf>

The City is now holding a self-guided online engagement event beginning today, November 20 and ending on December 11, 2020. The notice for this engagement is attached and the materials as well as comment form can be found here: <https://www.pickering.ca/en/city-hall/claremont-drainage-plan.aspx#>

The City welcomes your participation and review of the materials, and would be interested if you have any feedback on the project.

We will follow-up with Mississaugas of Scugog Island First Nation in the coming weeks to further discuss. Please do not hesitate to contact us should you have any questions or comments.

RE: Claremont Drainage Plan, City of Pickering

Dear Irina Marouchko,

I would like to acknowledge receipt of correspondence, which was received on January 18th, 2020, regarding the above noted project. As you may be aware, the area in which your project is proposed is situated within the Traditional Territory of Curve Lake First Nation. Our First Nation's Territory is incorporated within the Williams Treaties Territory and was the subject of a claim under Canada's Specific Claims Policy, which has now been settled. All 7 First Nations within the Williams Treaties have had their harvesting rights legally re-affirmed and recognized through this settlement.

Curve Lake First Nation is requiring a File Fee for this project in the amount of \$250.00 as outlined in our *Consultation and Accommodation Standards*. This Fee includes project updates as well as review of standard material and project overviews. Depending on the amount of documents to be reviewed by the Consultation Department, additional fees may apply. **Please make this payment to Curve Lake First Nation Consultation Department and please indicate the project name or number on the cheque.**

If you do not have a copy of *Curve Lake First Nation's Consultation and Accommodation Standards* they are available at <https://www.curvelakefirstnation.ca/services-departments/lands-rights-resources/consultation/>. Hard copies are available upon request.

Based on the information that you have provided us with respect to Claremont Drainage Plan, City of Pickering, Curve Lake First Nation may require a Special Consultation Framework for this project. Information on this Framework can be found on page 9 of our *Consultation and Accommodation Standards* document.

In order to assist us in providing you with timely input, it would be appreciated if you could provide a summary statement indicating how the project will address the following areas that are of concern to our First Nation within our Traditional and Treaty Territory: possible environmental impact to our

Government Services Building
22 Winookeedaa Road
Curve Lake, Ontario K0L1R0

Phone: 705.657.8045
Fax: 705.657.8708
www.curvelakefirstnation.ca

drinking water; endangerment to fish and wild game; impact on Aboriginal heritage and cultural values; and to endangered species; lands; savannas etc.

After the information is reviewed it is expected that you or a representative will be in contact to make arrangements to discuss this matter in more detail and possibly set up a date and time to meet with Curve Lake First Nation in person (or virtually).

Although we have not conducted exhaustive research nor have we the resources to do so, there may be the presence of burial or archaeological sites in your proposed project area. Please note, that we have particular concern for the remains of our ancestors. Should excavation unearth bones, remains, or other such evidence of a native burial site or any other archaeological findings, we must be notified without delay. In the case of a burial site, Council reminds you of your obligations under the *Cemeteries Act* to notify the nearest First Nation Government or other community of Aboriginal people which is willing to act as a representative and whose members have a close cultural affinity to the interred person. As I am sure you are aware, the regulations further state that the representative is needed before the remains and associated artifacts can be removed. Should such a find occur, we request that you contact our First Nation immediately.

Furthermore, Curve Lake First Nation also has available, trained Cultural Heritage Liaisons who are able to actively participate in the archaeological assessment process as a member of a field crew, the cost of which will be borne by the proponent. **Curve Lake First Nation expects engagement at Stage 1 of an archaeological assessment** so that we may include Indigenous Knowledge of the land in the process. We insist that at least one of our Cultural Heritage Liaisons be involved in any Stage 2-4 assessments, including test pitting, and/or pedestrian surveys to full excavation.

Although we may not always have representation at all stakeholder meetings, as rights holders', it is our wish to be kept apprised throughout all phases of this project. Please note that this letter does not constitute consultation, but it does represent the initial engagement process.

Should you have further questions or if you wish to hire a Liaison for a project, please contact Julie Kapyrka or Kaitlin Hill, Lands and Resources Consultation Liaisons, at 705-657-8045 or via email at JulieK@Curvelake.ca and KaitlinH@Curvelake.ca .

Yours sincerely,

Chief Emily Whetung
Curve Lake First Nation

Chipps, Steve

From: Kelly, Mary K

To: Julie Kapyrka; Kaitlin Hill
Cc: Marouchko, Irina; Chipps, Steve
Subject: RE: Claremont Drainage Plan, City of Pickering

Good afternoon Julie and Kaitlin,

Thank-you for your letter (dated January 29) regarding the City of Pickering's Claremont Drainage Plan. As identified in your letter, there is a \$250 File Fee, which the City will pay to initiate review. We are making arrangements to have this payment made.

With respect to your request for further detail, we offer the following about potential impacts.

- Drinking water: There are no anticipated impacts to drinking water based on an improved storm sewer system and drainage system in the Hamlet of Claremont.
- Endangerment to fish and wild game: There are no expected impacts to fish and wild game based on improving the Hamlet's drainage system (roadside ditches, and rear yard drainage swales).
- Aboriginal heritage and cultural values: A Stage 1 Archaeological Assessment (AA) has been conducted and a Stage 2 AA is recommended for areas not within road right-of-way. Most of the drainage improvements would be located within municipal road right-of-way; however, should alternatives be recommended outside the road right-of-way, the Stage 2 AA would be required.
- Endangered species, lands, etc.: It is understood from the Toronto Region Conservation Authority, that Redside Dace exist south of the Hamlet, as such any drainage improvements will be required to apply appropriate erosion and sediment controls. In addition, the tributary of Duffins Creek, commencing immediately south of Central Street, and west of Barclay Street, will be required to maintain the flow range directed to it from the existing storm sewer system on Central Street.

We would like to request the opportunity to discuss the project with you via a virtual meeting, and to better understand the Special Consultation Framework needs. Understanding that you're booking in April and beyond, could you suggest some days/times that would work best for you?

Please do not hesitate to contact us if you should have any questions, and we do look forward to engaging with you on this project.

Wishing you a wonderful and safe long weekend. Cheers, Mary

Good afternoon Chief Carr,

The City of Pickering is currently working on a Municipal Class Environmental Assessment for the Claremont Drainage Plan. We wanted to inform you of our second online engagement event that will be taking place August 19 to September 16, 2021. The notice for this engagement is attached and the materials as well as comment form can be found here: www.pickering.ca/claremont-drainage-plan

We will follow-up with Hiawatha First Nation in the coming weeks to further discuss. Please do not hesitate to contact us should you have any questions or comments.

Best regards,
Aniqa

Hi Julie,

Thanks for getting back to us. We would be happy to meet on October 13 – any time after 10 am works perfectly for us.

Thanks,
Aniq

Aaniin Aniq,

Thank you for your e-mail. Thank you for confirming the filing fee was sent. We should probably set up a meeting to discuss as you are closer to finalizing the plans for the project and we would like to explore opportunities to participate in the field studies. We are currently booking into October. Would the morning of October 13th work for your team?

If so, please send a meeting invite and link at your earliest convenience – as this date might be gone in a few days.

Miigwech.

Hi Kayla,

Unfortunately those two dates don't work for the project team, as they conflict with summer vacation schedules. Do you mind providing availability for September instead?

On a side note, I am available at 11 am on either the 19 or 26 to have a brief introduction to the project. I may not be able to answer all questions but will definitely take back the questions to the City/Wood's Project Manager and we can provide a more fulsome update at the second meeting.

Hello Aniqa,

Just responding on behalf of the Curve Lake First Nation team and direction from Julie.

Julie is taking over for the time being our archaeological side and Kaitlin has been on a leave and returning soon.

We would be interested in setting up a meeting to discuss the project.

Would you happen to have availability on Friday August 19th after 10am or Friday August 26th ? Our ecologist has some limited availability so just looking at his schedule first. If those don't work, myself and Francis (CC'd) would be happy to have a shorter intro meeting with you so get up to speed on the project. Francis and I are managing all of the initial consultation matters at Curve Lake First Nation for the time being.

Thanks very much,

Kayla Wright, c.Tech.

Good morning Julie and Kaitlin,

We wanted to follow-up on the email below to better understand Curve Lake First Nation's Special Consultation Framework and discuss some of the concerns raised in February 2021 on the Claremont Drainage Plan in the City of Pickering. The Project Team would be happy to set up a meeting in the next few weeks, if that works with your availability.

As a reminder, we also provided Public Information Centre #2 materials in August 2021 for review (attached). If you have any comments on those documents, please don't hesitate to let us know. Information about the Project can be found on the Project website - [Claremont Drainage Plan - City of Pickering](#)

I will also follow up via phone call next week.

Subject: RE: Claremont Drainage Plan, City of Pickering

Good afternoon Julie and Kaitlin,

Thank-you for your letter (dated January 29) regarding the City of Pickering's Claremont Drainage Plan. As identified in your letter, there is a \$250 File Fee, which the City will pay to initiate review. We are making arrangements to have this payment made.

With respect to your request for further detail, we offer the following about potential impacts.

- Drinking water: There are no anticipated impacts to drinking water based on an improved storm sewer system and drainage system in the Hamlet of Claremont.
- Endangerment to fish and wild game: There are no expected impacts to fish and wild game based on improving the Hamlet's drainage system (roadside ditches, and rear yard drainage swales).
- Aboriginal heritage and cultural values: A Stage 1 Archaeological Assessment (AA) has been conducted and a Stage 2 AA is recommended for areas not within road right-of-way. Most of the drainage improvements would be located within municipal road right-of-way; however, should alternatives be recommended outside the road right-of-way, the Stage 2 AA would be required.
- Endangered species, lands, etc.: It is understood from the Toronto Region Conservation Authority, that Redside Dace exist south of the Hamlet, as such any drainage improvements will be required to apply appropriate erosion and sediment controls. In addition, the tributary of Duffins Creek, commencing immediately south of Central Street, and west of Barclay Street, will be required to maintain the flow range directed to it from the existing storm sewer system on Central Street.

We would like to request the opportunity to discuss the project with you via a virtual meeting, and to better understand the Special Consultation Framework needs. Understanding that you're booking in April and beyond, could you suggest some days/times that would work best for you?

Please do not hesitate to contact us if you should have any questions, and we do look forward to engaging with you on this project.

Wishing you a wonderful and safe long weekend. Cheers, Mary

1.1 Indigenous Engagement

Indigenous engagement is a key component of the Class EA process. The Ministry of the Environment, Conservation and Parks (MECP) delegated the procedural aspects of the duty to consult to the City of Pickering (City) in its response to the Notice of Commencement on December 7, 2020.

Copies of all Indigenous engagement documents can be found in appendix N.

1.1.1 Identification of Indigenous Nations

In consultation with the MECP, the City sought direction on the identification of Indigenous Nations that may have an interest in the Municipal Class Environmental Assessment. Request for confirmation was submitted to the MECP on December 7, 2020. Upon confirmation from the MECP, an email including the Notice of On-line PIC were sent to the following Indigenous Nations on November 20, 2020:

- Alderville First Nation (AFN);
- Curve Lake First Nation (CLFN);
- Hiawatha First Nation (HFN); and
- Mississaugas of the Scugog Island First Nation (MSIFN);

Based on understood Indigenous Nation specific consultation protocols, individual communications were issued to the Nations. Due to the COVID-19 pandemic, several Indigenous Nations identified preference for communications to be through email only. The Nations were initially contacted on August 8, 2021, and August 19, 2021. These two communications shared details about the second online engagement event that took place between August 19 to September 16, 2021.

1.1.1.1 Alderville First Nation

Following the August 8, 2021 correspondence, a phone call was held between AFN and WSP. As a follow-up to the phone call, WSP sent an email on August 19, 2021 to inquire if the Nation had any comments or concerns about the Project. AFN responded and identified they had no concerns and that they would be interested in the study reports (e.g. Species at risk, archaeological reports). WSP responded stating that the Nation would be kept informed about their items of interest.

1.1.1.2 Curve Lake First Nation

On February 2, 2021, CLFN sent an email containing a letter which outlined the Nation's concerns with the Claremont Drainage Plan. CLFN was concerned about the drinking water, the endangerment of fish and wild game, as well as the potential Aboriginal heritage that could be

discovered. WSP responded to these concerns on April 1, 2021, and offered to discuss the project further via a virtual meeting.

WSP followed up with CLFN on July 20, 2022 to better understand CLFN's Special Consultation Framework and discuss some of the concerns raised in February 2021. WSP offered to set up a meeting to discuss the Project and reminded CLFN of the PIC materials available for review and comment. WSP followed-up on via phone call and email on July 28, 2022. On August 2, 2022, Francis Chua Consulting, on behalf of CLFN responded identifying that there is interest in having a meeting and provided suggested dates and times. WSP followed-up on August 8, 2022 and September 8, 2022 to confirm the date and time for the meeting. No further response was received from Francis Chua Consulting or CLFN.

1.1.1.3 Hiawatha First Nation

Following the August 8, 2021 correspondence, HFN responded and identified that they had no questions or concerns at this time.

1.1.1.4 Mississaugas of the Scugog Island First Nation

WSP followed up with MSIFN on July 20, 2022 to share the Project website and request any comments or concerns on the Project. On the same day, MSIFN responded noting that they reviewed the Project website and do not have any comments on the PIC materials. However, MSIFN requested the Master Plan Report for review when it is completed.
