

Engineering Services Department

Issued on: April 22, 2021

The Study

The City of Pickering has completed the Integrated Transportation Master Plan (ITMP) study. The ITMP is a long-term, strategic planning document that directs transportation policies, programs, and infrastructure to meet the needs of all transportation users from now through to 2031. The plan presents a package of actions that will help the City achieve its transportation vision over time.

Community Input

The Pickering ITMP is a product of a collaborative effort between Pickering staff, stakeholders and the public. Three rounds of public and stakeholder engagement and one series of meetings with Pickering Members of Council were held over the course of the study. Public and stakeholder comments received were used to shape the plan.

The Process

The ITMP followed the master planning process requirements for Phases 1 and 2 of the Municipal Class Environmental Assessment process (Oct 2000, amended 2007, 2011 and 2015), as approved under the *Ontario Environmental Assessment Act*. The plan addresses need and justification at a broad level. Recommended projects will require further detailed studies as per the Municipal Class Environmental Assessment process.

Study Review and Completion

The completed ITMP is being placed on public record for a 30-day public review period in accordance with the requirements of the Municipal Class EA process starting April 22, 2021. Due to the ongoing COVID-19 pandemic situation, only digital copies are available for review from the City of Pickering website at pickering.ca/ITMP.

A Transportation Vision for Pickering:

A safe and well-connected transportation system that offers inclusive mobility, supports complete and sustainable communities and facilitates continued economic growth.

Recommendations:

The ITMP provides infrastructure and policy recommendations across the following focus areas:

- Road Network Development
- Active Transportation Network
- Complete Streets
- Access to Transit
- Goods Movement
- Transportation Demand Management
- Parking Management
- Access Management
