The *Building Code Act* prohibits the issuance of a building permit if the proposed construction or demolition will contravene an applicable law as defined by the Building Code. The questions below will help you to determine if an applicable law applies to our project. No timeframe for building permit review can be established until all required applicable law approvals are completed and the approval documents are submitted to the City Development Department, Building Services section.

If the answer is **yes** to any question, the relevant approval documents must be submitted with this permit application. Where any required approval has **not** been obtained, the agencies listed on pages 3 and 4 of this form must be contacted to obtain approval, and the declaration on the bottom of this form must state accordingly.

Applicable Laws & Building Permits

Approvals from other agencies are required in many instances before a building permit can be processed and issued. These approvals are **not** administered by the Building Services section. The fastest way to obtain a building permit is to ensure all these other approvals are completed (or do not apply) before applying for a building permit. The Building Services section is required by law to prioritize applications that are fully complete in terms of applicable law approvals and document submissions. Building permit documents must be consistent with applicable law approvals.
