Limitations of The Report

1.0 EXECUTIVE SUMMARY

GeoPro Consulting Limited ("GeoPro") was retained by 869547 Ontario Inc. (the "Client") to conduct a Phase One Environmental Site Assessment ("ESA") for the property located at 3225 Balsam Road (Concession 5 Road), Pickering, ON (the "Site" or "Phase One Property").

The Site consists of one (1) rectangular shaped parcel of land. At the time of this Phase One ESA, the Site was vacant. The Site is currently not occupied. However, remnants of residential house were observed. Thus, the current land use of the Site is considered residential use. We understood that the Client intends to develop the Site with residential houses. The report was completed as an update to the previous Phase One ESA completed by GeoPro in May 2017 in support of potential filing with the environmental registry under Ontario Regulation 406/19 ("O. Reg. 406/19"); therefore, it does not strictly meet all the requirements of O. Reg. 153/04 and is not intended to support RSC filing. If filing an RSC with the Ministry of the Environment, Conservation and Parks ("MECP") is eventually required, additional consulting and associated project work will be required.

The purpose of this updated Phase One ESA was to find Potentially Contaminating Activities ("PCAs") within the Phase One Property and on properties within a 250 m radius from the boundaries of it ("Phase One Study Area") and indicate Areas of Potential Environmental Concerns ("APECs") and the correlated Contaminants of Potential Concern ("COPCs") located in the soils being excavated on the Site to assess if further investigation is required by conducting a Sampling and Analysis Plan and Soil Characterization Report.

GeoPro conducted the site reconnaissance on July 28, 2021. The weather was sunny and the temperature was 22°C. The following is a summary of the Phase One ESA findings based on the review of readily available records, interviews with persons knowledgeable about the Site, and observations made during site reconnaissance:

1) The Phase One Property consists of one (1) rectangular shaped parcel of land, with a total area of approximately 179 100 m^2.

2) Reportedly, the Phase One Property was considered to be firstly developed for residential purposes prior to 1971. The Phase One Property has been owned by the current owner 869547 Ontario Inc. since 1991. Currently, the Phase One Property is vacant.

The PCAs, APECs, and contaminants of potential concern ("COPCs") that were indicated at the Site are summarized in the table below.

APEC	Location of APEC	PCA Number	Location of PCA	Figure ID	COPCs	Media Potentially Impacted
APEC 1	Former residential house area	30	**On-Site** Former residential house area	AP2	Metals, PAHs	Soil

APEC	Location of APEC	PCA Number	Location of PCA	Figure ID	COPCs	Media Potentially Impacted
APEC 2	Northwest corner portion of the Site	40, 52	**Off-Site** 3330 Balsam Rd	E1, AP1, SN1	Metals, PHC, BTEX, PAHs, OCs	Soil
APEC 3	Southwest boundary area of the Site	40	**Off-Site** 2700 Audley Road North	CD1, SN2	Metals, OCs	Soil

Note: PCAs described specifically for the Phase One Property with reference to the applicable item number in the Table of Potentially Contaminating Activities provided in Schedule D of *O.Reg.153/04* as amended, where applicable.
#30 – Importation of Fill Material of Unknown Quality
#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems

The contaminants of potential concern ("COPCs") are listed as follows.
PAHs = Polycyclic Aromatic Hydrocarbon
BTEX = Benzene, Toluene, Etylbenzene, Xylene
PHCs = Petroleum Hydrocarbon
OCs = Organochloride Pesticide

Based on the findings of the Phase One ESA, GeoPro offers the following recommendations.

1) GeoPro recommends that a Sampling and Analysis Plan and a Soil Characterization Report in accordance with O. Reg. 406/19 are conducted at the Site to characterize the subsurface soil conditions in the soil being excavated at the Site

NOTE: This executive summary provides a brief overview of the study findings. It is not intended to substitute for the complete report, nor does it detail specific issues discussed within the report. This summary is not to be adopted in lieu of reading the complete report.

2.0 INTRODUCTION

The Site consists of one (1) rectangular shaped parcel of land. At the time of this Phase One ESA, the Site was vacant. The Site is currently not occupied. However, remnants of residential house were observed. Thus, the current land use of the Site is considered residential use. We understood that the Client intends to develop the Site with residential houses. The report was completed as an update to the previous Phase One ESA completed by GeoPro in May 2017 in support of potential filing with the environmental registry under Ontario Regulation 406/19 ("O. Reg. 406/19"); therefore, it does not strictly meet all the requirements of O. Reg. 153/04 and is not intended to support RSC filing. If filing an RSC with the Ministry of the Environment, Conservation and Parks ("MECP") is eventually required, additional consulting and associated project work will be required.

The purpose of this updated Phase One ESA was to find Potentially Contaminating Activities ("PCAs") within the Phase One Property and on properties within a 250 m radius from the boundaries of it ("Phase One Study Area") and indicate Areas of Potential Environmental Concerns ("APECs") and the correlated Contaminants of Potential Concern ("COPCs") located in the soils being excavated on the Site to assess if further investigation is required by conducting a Sampling and Analysis Plan and Soil Characterization Report.

2.1 Phase One Property Information

A copy of the subdivision plan for the Phase One Property is provided in Appendix A. A tabular summary of the information regarding the Phase One Property is provided below.

Municipal Addresses	3225 Balsam Road (Concession 5 Road), Pickering, Ontario		
Legal Descriptions	PT LTS 3 & 4 CON 5 PICKERING, PT 1 ON PLAN 40R25092; PICKERING, REGIONAL MUNICIPALITY OF DURHAM		
Parcel Identification Numbers ("PIN")	26404-0375 (LT)		
Roll Numbers	18010300083020000000		
Area	Approximately 179 100 m^2 (as per the plan of subdivision)		
UTM (NAD 83)	Zone 17	658506.53 Easting	4864926.26 Northing
Owner Contact	869547 Ontario Inc.	Name: Paul Bigioni Email: paul@grandhomescanada.com	
Client Contact	869547 Ontario Inc.	Name: Paul Bigioni Email: paul@grandhomescanada.com	
Current Occupant(s)	Vacant		
Current Zoning	Country Residential (as per City of Pickering Official Plan – Edition 8)		
Proposed Future Land Use	Residential		

3.0 SCOPE OF INVESTIGATION

The general scope of work for the Phase One ESA consisted of the following tasks:

- A data search and review for the Phase One Properties and the neighboring properties in the Phase One Study Area;
- Interviews with persons knowledgeable about the Site;
- Site reconnaissance;
- An assessment and evaluation of the information gathered; and
- Preparation of a report summarizing the findings of the Phase One ESA.

4.0 RECORDS REVIEW

4.1 Summary of General Records Review

GeoPro reviewed readily available records which included physical settings, current and historical information sources regarding the Site, including, but not limited to, aerial photographs, city directories, fire insurance plans ("FIPs"), ownership titles, historical environmental site assessment, site operating records, a regulatory database search (i.e. MECP Freedom of Information ("FOI") and Technical Safety & Standard Authority ("TSSA") records), and the MECP water well records. A tabular summary of information obtained and their sources are summarized below.

Phase One Study Area Determination

Based on a review of the available historical information and the observations made during the site reconnaissance, no significant potentially contaminating properties were noted beyond 250m radius from the Site boundaries. The Phase One Study Area generally includes the Phase One Property and all other properties wholly or partly located within a 250 m radius from the boundary of the Phase One Property, in accordance with O. Reg. 153/04, as amended. The properties within the Phase One Study Area were subject to the Phase One ESA and our review of historical records. The Phase One Property and Phase One Study Area are presented on Drawings No. 1

First Developed Use Determination

Based on a review of the available historical information, the Phase One Property was considered to be firstly developed for residential purposes prior to 1954.

Fire Insurance Plans ("FIPs")

A review of Fire Insurance Plans ("FIPs") was completed through a database search carried out by Opta Historical Environmental Services Enviroscan ("Opta") for the Site and the surrounding properties within 250 m radius of the Phase One Property. No record of FIP was found for the Phase One Property and surrounding properties within 250m radius of the Phase One Property.

Chain of Title

Based on the review of the title search results, the Phase One Property has been owned by the current owner 869547 Ontario Inc. since 1991. A tabular summary of the owners and dates is provided in Table 1. A copy of land title search records is presented in Appendix B.

Previous Reports

GeoPro previously conducted a Geotechnical Investigation and a Preliminary Hydrogeological Site Assessment at the Site. Fill material was encountered on the Site. A tabular summary of the main findings of the reports is provided in Table 2. A copy of pages extracted from the discussed documents and reports is presented in Appendix C.

City Directories

A review of the City Directories for years 1979, 1984, 1989, 1993, and 2000 was carried out from the Toronto Library database for the Site and the surrounding properties within a 250 m radius of the Phase One Property. The properties which may cause potential environmental concerns regarding the Phase One Property were indicated in Table 3.

4.2 Environmental Source Information

4.2.1 Environmental Database Search

Records and regulatory agency database review was completed through a database search carried out by Environmental Risk Information Services ("ERIS"). The ERIS report included a search of federal, provincial, and private database records regarding the Site and the surrounding properties within a 250 m radius of the Phase One Property. A copy of the ERIS report is presented in Appendix D.

As provided in Table 4, GeoPro prepared a tabular summary of the findings which may have environmental concerns regarding the Phase One Property.

4.2.2 Summary of Regulatory Records Review

Regulatory records reviewed included a search of the FOI database and a search of the TSSA's database. A copy of our written requests and the responses from each regulatory agency are included in Appendix E. A tabular summary of the regulatory records request, review and agency responses are provided in Tables 5A and 5B.

4.3 Physical Setting Sources

A summary of information obtained in terms of the physical settings of the Phase One Property and the Phase One Study Area is discussed as follows.

4.3.1 Aerial Photographs

Aerial photographs were reviewed for a visual chronology of the previous land uses on the Phase One Property and the properties within the Phase One Study Area.

Aerial photographs for the years 1954, 1971, 1978, and 2000 were obtained from Archive of Ontario. Aerial photographs for the years 2005, 2009, 2015, and 2019 were obtained from Google Earth, as presented in Figures No. 1 to 8.

A summary of the observed features in the aerial photographs of the Phase One Property and Phase One Study Area are presented in Table 6.

4.3.2 General Physical Settings

Physiography

Based on the data obtained from the Ontario Geological Survey ("OGS") database, the physiography of the Site and the Phase One Study Area are summarized in the following table.

Record Source	Physiography Region	Physiography Areas
Online Physiography Map of Southern Ontario	Iroquois Plan	Sand Plains

Quaternary Geology

Based on the data obtained from the OGS database, the quaternary geology of the Site and the Phase One Study Area are summarized in the following table.

Record Source	Deposit Types
Online Quaternary Geology Map of Ontario	Halton Till deposits consisting predominantly of silt to silty clay matrix, high in matrix carbonate content and clast poor. Glaciolacustrine deposits consisting predominantly of sand, gravelly sand and gravel, nearshore and beach deposits.

Bedrock Geology

Based on the data obtained from the OGS database, the bedrock geology of the Site and the Phase One Study Area are summarized in the following table.

Record Source	Geological Period	Bedrock Type	Bedrock Depth (mBGS)
Bedrock Geology Map of Ontario	Upper Ordovician	Limestone, dolostone, shale, siltstone	Approximately 26 - 32

Hydrology

Based on the data obtained from the database maintained by the local conservation authority, the hydrology information regarding the local watershed and open water body on the Site and the Phase One Study Area is summarized in the following table.

Watershed	Subwatershed	On-Site Open Water	On-Site Open Water		
			Name	Flow Direction	Discharge Location
Carruthers Creek Watershed	Carruthers Creek Subwatershed	Yes	Carruthers Creek	Towards Southeast	Approximately 10.9km southeast of the Site

Topography

Based on the data obtained from Canada Atlas – Toporama, the topography at the Site and in the vicinity of the Site are summarized in the following table.

Record Source	Topography	Slope Direction	Elevation Range (mASL)	Note
Canada Atlas – Toporama	Relatively flat with a gentle slope	Slope towards the Creek at the center of the Site	About 147 to 129	Shown in Figure No. 9

mASL - meters above sea level

Inferred Shallow Groundwater Flow Direction

Control Factors	Flow Direction	Discharge Location
Topography	East; Southwest	Carruthers Creek
Distribution of nearby open water body		
Previous Reports		

Fill Materials

Record Source	Review Findings	Environmental Concern
Previous Reports	Fill materials were encountered on the Phase One Property	Presence of fill material with unknown quality
Aerial Photograph	Building demolishment was observed on the Phase One Property, where the present of fill materials is anticipated	

Areas of Natural Significance

Based on the data obtained from the database maintained by the Ministry of Natural Resources and Forestry ("MNRF") and on the local official plan, assessment of areas of natural significance of the Site and the Phase One Study Area are summarized in the following table.

Areas of Natural Significance	Data Source	Location
Provincial Park or Conservation Reserve	MNRF	Beyond the Phase One Property and Phase One Study Area
Areas of Natural Significance and Scientific Interest (ANSI)	MNRF	
Provincial Significant Wetland	MNRF	
Niagara Escarpment Area	MNRF	
Oak Ridges Moraine Area	MNRF	
Local Regulated Area	Toronto and Region conservation	Within the Phase One Property and Phase One Study Area

Woods were noted along Carruthers Creek, and along side line 4; further assessment of natural significance along the Carruthers Creek and Side Line 4 was not conducted in this Phase One ESA. The Site and the Phase One Study Area are regulated under Ontario Regulation 166/06 by the Toronto Region Conservation Authority and as such, may require a permit for development.

Well Records

Based on the MECP Water Well Records database, a total of twenty-two (22) water wells were recorded within the Phase One Study Area. Fourteen (14) wells were recorded to be water supply wells. A summary of water well records is included in Appendix F (MECP Well Record Report) and is presented in the following table.

Well Location	Well Type	Well Number
On-Site	Monitoring	7
Phase One Study Area	Irrigation	1
	Domestic	11
	Livestock/Domestic	1
	Commercial	1
	Public	1
	Total Well Records:	**22**

Based on the available records, water was encountered at depths ranging from approximately 1.22 mBGS to 32.31 mBGS in overburden deposits. Bedrock was encountered at depths ranging from 24.38 mBGS to 33.53 mBGS. However, the description or the coordinates of the well records may be unreliable or out of the date, a door-to-door well survey may be considered.

Wellhead Protection Area ("WHPA")

Based on Ontario Source Protection Information Atlas, the Site and the Phase One Study Area are not located within a municipal WHPA.

Intake Protection Zone ("IPZ")

Based on the information obtained from the Ontario Source Protection Information Atlas, the Site and the Phase One Study Area are not located within any IPZ.

Highly Vulnerable Aquifers

Based on the information obtained from the Ontario Source Protection Information Atlas, the Site and the Phase One Study Area are located in highly vulnerable aquifers area.

4.4 Site Operating Records

No site operating record was provided by the Client for GeoPro to review.

5.0 INTERVIEW

A summary of the interview GeoPro completed is provided in the following table.

Item	Information	Figure ID
Date and Place of Interview	Questionnaire form completed on June 23 2021	-
Interview Method	Completion of interview questionnaire form.	-
Person Interviewed	Paul Bigioni	-
Relevant Information Concerning PCAs	No on-site PCAs are anticipated based on the information obtained from the interview questionnaire form.	-

A copy of the Interview Questionnaire can be found in Appendix G

6.0 SITE RECONNAISSANCE

The site reconnaissance consisted of a visual inspection of the Phase One Property and observation of the neighboring properties using public access ways to observe the presence/absence of PCAs, water bodies, and areas of natural significance.

Selected photographs taken during the site reconnaissance including descriptive captions are provided in Appendix H.

6.1 General Conditions

General situations encountered during the site reconnaissance are summarized in the following table.

Item	Information
Date	July 28, 2021
Weather Conditions	22 ^{o}C, sunny
Length of Site Reconnaissance Time	1.5 hours
Impediments	Some areas of the Site were inaccessible due to a heavily wooded area running through the central portion of the Site along Carruthers Creek It is assumed nothing has been changed in these portions of the Site since the previous Site visit conducted in 2017. Selected Photographs from the Site visit conducted in 2017 have been included in Appendix H.
Name and Qualifications of the Person Conducting the Site Reconnaissance	Julia Csath conducted the site reconnaissance. The Phase One ESA was supervised by David Liu, P. Eng, QP.

6.2 Specific Observations at the Phase One Property

The specific observations made during the site reconnaissance at the Phase One Property are summarized in Table 7.

6.3 Observation of Neighboring Properties

At the time of the site reconnaissance, observations were also conducted on the neighboring properties via publicly accessible areas. The Site and surrounding land use plan are provided on Drawing No. 2. The specific observations of the neighboring properties are summarized in Table 8.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses

Based on the review of the available Chain of Title, historical aerial photos, previous reports, and FIPs, the Phase One Property was considered to be firstly developed for residential purposes prior to 1954. The Phase One Property has been owned by the current owner 869547 Ontario Inc. since 1991. Currently, the Phase One Property is vacant. The current and past uses of the Phase One Property are summarized in Table 9.

7.2 Potentially Contaminating Activities ("PCAs")

Based on the findings of the Phase One ESA, PCAs were found on the Phase One Property as well as the off-site properties within the Phase One Study Area. The PCAs and their environmental concerns contributing to the Phase One Property are summarized in Table 10.

7.3 Areas of Potential Environmental Concerns ("APECs")

Based on the analyses of the indicated PCAs and associated environmental concerns, APECs were found in three (3) areas on the Phase One Property. The APECs and associated PCAs and contaminants of potential concern ("COPCs") are shown in Drawing No. 3 and summarized in Table 11.

7.4 Phase One Conceptual Site Model ("CSM")

A Phase One Conceptual Site Model ("CSM") was prepared to present a summary of the findings of the Phase One ESA and consists of this text report with appendices, and the following drawings:

- Drawing No. 1 – Site Location Plan
- Drawing No. 2 – Phase One Property and Surrounding Land Use
- Drawing No. 3 – PCA and APEC Locations

8.0 CONCLUSIONS AND RECOMMENDATIONS

8.1 Conclusions

GeoPro conducted this Phase One ESA in general accordance with O. Reg. 153/04. Based on the findings of the Phase One ESA, PCAs were found on the Phase One Property as well as the off-site properties within the Phase One Study Area. APECs were indicated to be present in three (3) areas in the Phase One Property. The contaminants of potential concern include metals, petroleum hydrocarbons ("PHCs"), benzene, toluene, ethylbenzene and xylene ("BTEX"), polycyclic aromatic hydrocarbons ("PAHs") and Organochloride Pesticide ("OCs") in soil.

8.2 Recommendations

Based on the findings of Phase One ESA, GeoPro offers the following recommendations:

1) GeoPro recommends that a Sampling and Analysis Plan and a Soil Characterization Report in accordance with O. Reg. 406/19 are conducted at the Site to characterize the subsurface soil conditions in the soil being excavated at the Site

9.0 SIGNATURE

This report was conducted by Sinclair Kenrick Hidajat and supervised by David Liu, who is a Qualified Person with the MECP as defined under Ontario Regulation 153/04.

We trust that the information contained in this report is complete within our terms of reference. If you have any questions or require further information, please do not hesitate to contact our office.

Sincerely,

GeoPro Consulting Limited

Prior to 03/1991	Cougs Investments Ltd.	-
03/1991 – Present	869547 Ontario Inc.	-

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 2: Summary Table of the Previous Reports

1. Previous Investigation by GeoPro

GeoPro previously conducted a Geotechnical Investigation, and a Preliminary Hydrogeological Site Assessment at the Site. The results of the investigations were summarized in the following reports:

- *"Geotechnical Investigation, Slope Stability Analysis and Geotechnical Setback Study, Part of Lots 3 and 4, Concession 5, City of Pickering, Ontario",* dated July 05, 2017, prepared by GeoPro Consulting Ltd. *(GeoPro Consulting Ltd GeoTech 2017)*

- *"Preliminary Hydrogeological Site Assessment, Proposed Residential Developments, Parts of Lots 3 and 4, Concession 5, Pickering, Ontario",* dated May 30, 2017, prepared by GeoPro Consulting Ltd*. (GeoPro Consulting Ltd HydroG 2017)*

GeoPro has prepared the following table for the summary of the main findings of the reports as presented below:

Investigation	Review Findings	Figure ID
GeoPro Consulting Ltd. GeoTech 2017	Seven (7) boreholes (Boreholes BH1 to BH7) were advanced at the locations. The boreholes were drilled to depths ranging from about 6.5 m to 29.6 m below the existing ground surface (mBGS). Seven (7) monitoring wells (51 mm O.D.) were installed at the borehole locations BH1 to BH7 to monitor the long-term groundwater conditions.	-
	The soil stratigraphy at the Site was comprised of topsoil underlain by fill material (silty fine sand/ reworked silty fine sand/ sand/ silt), underlain by silty (fine) sand, fine sand and silt, fine sandy silt and silt underlain by clayey silt, underlain by clayey silt till, silty clay till or gravelly sand or sandy silt till, sand and silt till, silty sand till, underlain by various native soils consisting of (probable) weathered grey shale interbedded with limestone/siltstone	PR1
	Fill materials were encountered at a depth of about 0.7 mBGS. Bedrock was encountered at a depth of about 28.4 mBGS	-
	Groundwater was encountered at depths ranging from 0.27 to 1.72 mBGS during monitoring period	-
	A total of six (6) soil samples from BH1, BH2, BH4, BH5, BH7 were submitted for analysis for metals and inorganics and VOCs. The results were compared to Table 1 SCS and no exceedance was noted.	-
GeoPro Consulting Ltd. HydroG 2017	Advancement of seven (7) boreholes (Boreholes BH1 to BH7) drilled to the depths ranging from approximately 6.5 to 29.6 mBGS, and installation of seven (7) monitoring wells in the advanced boreholes. In addition, ten (10) test pits were advanced to the depth of approximately 0.5 mBGS for soil sampling.	-
	The soil stratigraphy at the Site in the West portion was generally consisted of fill materials and/or topsoil, underlain by a layer of cohesionless soils (silt, sandy silt, sand and silt, silty sand), and then underlain by different types of till deposits (clayey silt till, silty clay till, sandy silt till, sand and silt till); the soil stratigraphy in the East Portion of the Site generally consisted of fill and/or topsoil, underlain by different types of till deposits (clayey silt till, sandy silt till, silty sand till), with zones of cohesionless soils (sandy silt, silty sand, gravelly sand), locally with clayey silt.	PR1

Investigation	Review Findings	Figure ID
	Bedrock was encountered at the depth of approximately 28.4 mBGS in the West portion of the Site, likely to be shale bedrock.	-
	Ground water level from surface ranged from 0.27 to 2.85 mBGS	-
	Carruthers Creek divides the shallow groundwater into two (2) separate groundwater flow regimes. In the West portion of the Site, groundwater flow is toward the Southeast and in the East portion of the Site, groundwater flow was towards the Southwest.	-
	The analytical results were compared with the respective criteria specified in Durham Region Sanitary and Storm Sewer Use bylaw and PWQO. Exceedances were found for metals and phenols parameters specified in Durham Region Sanitary and Storm Sewer Use bylaw or PWQO.	-

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 5A: Summary Table of MECP FOI Search

Agency	Documents Requested	Date of Request	Results	FID
MECP FOI and Privacy Office	Documented environmental concerns and citations pertaining to the Site	March 29, 2017	The MOECC response dated March 29, 2017 indicated that no records were available for the Phase One Property. A copy of the correspondence is attached in Appendix E.	-

Table 5B: Summary Table of TSSA Record Search

Agency	Documents Requested	Date of Request	Date of Response Received	Results	FID
Technical Standards and Safety Authority	Records of storage tanks pertaining to the Site	July 2, 2021	July 5, 2021	No records were found for the Phase One Properties and four (4) properties within Phase One Study Area. The correspondence with the TSSA is included in Appendix E.	-

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 6: Summary Table of The Aerial photographs

Year	Phase One Property		Phase One Study Area	
	Findings	FID	Findings	FID
1954	The resolution of the aerial photograph is poor	-	The resolution of the aerial photograph is poor	-
	The Phase One Property appeared to be vacant	-	Roadways Concession Road 5, Sideline 4 and Audley Road North noted on Figure No.1	-
	Carruthers Creek crosses the central portion of the Site. Woods and wetlands were noted along the creek.	-	The Phase One Study Area appeared to be not developed and Carruthers Creek crosses the Phase One Study from north to south	-
1971	The resolution of the aerial photograph is poor	-	The resolution of the aerial photograph is poor	-
	Residential house appeared on the west portion of the Site.	-	Likely residential houses noted along Audley Road North, Sideline 4 and 5th Concession Road.	-
1978	The resolution of the aerial photograph is poor	-	The resolution of the aerial photograph is poor	-
	Similar to the 1971 aerial photograph	-	Similar to the 1971 aerial photograph	-
			Ongoing development appeared on the south to east portion of the Phase One Study Area	-
2000	The resolution of the aerial photograph is poor	-	The resolution of the aerial photograph is poor	-
	Similar to the 1978 aerial photograph	-	New road Buggey Lane appears as labelled on Figure No. 4	-
		-	Golf Course appeared developed on the South adjacent to the Site	AP1
			Barn structure and residential house appeared on the East portion of the Study Area	-
			Islamic Foundation School Durham appeared on the southeast of the Site.	-
2005	Similar to the 2000 aerial photograph	-	Similar to the 2000 aerial photograph	-
			New road Bunhill Court appears as labelled on Figure No. 5; Residential houses appeared along the Bunhill Court.	-
			Industrial equipment storage area appeared on the northwest of the Site.	AP2
2009	Similar to the 2005 aerial photograph	-	Similar to the 2005 aerial photograph	-
2015	The resolution of the aerial photograph is poor	-	The resolution of the aerial photograph is poor	-
	Similar to the 2009 aerial photograph	-	Similar to the 2009 aerial photograph	-
	Residential building has been removed	AP3		
2019	Similar to the 2015 aerial photograph	-	Similar to the 2015 aerial photograph	-
	The Site appeared to be vacant. However, likely parked RV / trailer is observed on the Site.	-	New Roadway Dexshire Drive appears as labeled in Figure No 8.	-

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 7: Summary Table of Specific Observations at the Phase One Property

Figure ID	Item	Observations
Entire Phase One Property		
-	Site Location	3225 Concession Road 5, Parts of Lots 3 and 4.
-	Current Occupants	The Site was observed to be vacant during site reconnaissance.
-	Storage Tanks	No underground/above the ground storage tank ("USTs/ASTs") was observed at the Site on the day of site reconnaissance.
-	On-Site Wells	Monitoring wells were observed at the Site on the day of site reconnaissance.
-	Underground Utilities	No gas meters or buried gas lines were observed on the Site. A high pressure watermain was observed on the day of site reconnaissance.
-	Watercourse, Ditches and Standing Water	According to the Ontario Source Protection Atlas Carruthers Creek flows through the central portion of the Site. The central portion of the Site had limited access due to the heavily wooded area the watercourse was not observed as a result of this.
-	Rail Spurs	No rail spur was observed at the Site on the day of site reconnaissance.
-	Stressed Vegetation	No stressed vegetation was observed at the Site on the day of site reconnaissance.
SS1	Fill and Debris Material	Fill material and debris were noted in the western portion of the Site on the day of site reconnaissance.
On-site Buildings or Structures		
-	Buildings or Structures	The Site was not occupied by any buildings on the day of the site reconnaissance.
-	Enhanced Investigation Property	Based on the current and historical property uses, the Phase One Property is not considered as an enhanced investigation property as described in Clause 32 (1)(b) of O. Reg. 153/04.
-	Other observation	Transformer was noted on a telephone pole in the western portion of the Site. No staining, spills, or discolouration was noted.
-		Woodland covers the central portion, southwest portion, and northern portion of the Site, access to the woodland was limited
Additional Potential Environmental Concerns – Designated Substances		
-	Radon	Based on the Radon Potential Map of Ontario, the Site is located in an area with elevated radon hazard.

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 8: Summary Table of Observations of The Neighbouring Properties

Figure ID	Item	Observations
-	Adjacent Land Uses	**North:** Agricultural or Other and Parkland; further north: Agricultural or other **South:** Parkland and institutional; further south: Residential and Parkland **West:** Sideline 4; further west: Residential, Commercial and agricultural or other **East:** Residential; further east: Residential
-	Water Body	According to the Ontario Source Protection Atlas Carruthers Creek was noted to be flowing in the central portion of Study Area the creek flows southerly. The central portion of the Study area had limited access due to the heavily wooded areas, and private properties.
-	Areas of Natural Significance	Woods were noted throughout the central, northern, and western portions of the Phase One Study Area; a further study should be considered to evaluate the presence of area of natural significance. Further assessment of the natural significance at the Site and the Study Area were not carried out in this study.
SN1	Other observations	Industrial storage was observed at 3330 Balsam Road.
SN2		Deer Creek Golf was observed at 2700 Audley Road North.

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 9: Summary Table of The Current and Past Uses of The Phase One Property

Date	Names of Owner	Description of Land Use	Source of Information	Notes
3225 Balsam Road, Pickering, ON - PIN: 26404 - 0375 (LT)				
Prior to 1991	Cougs Investments Ltd.	Residential Use	Chain of Title; Aerial Photograph	Based on the 1954, 1971, and 1978 aerial photographs the western portion of the Site is occupied by a residential house. The eastern portion of the Site appears vacant.
1991-Present	869547 Ontario Inc.		Chain of Title; Aerial Photograph; Site Visit	Based on the 2000, 2005, and 2009 aerial photographs the western portion of the Site appears to be occupied by the same residential house and the eastern portion of the Site is vacant. Based on the 2015 and 2019 aerial photographs the residential house in the western portion of the Site has been removed. The eastern portion of the Site is vacant. Based on the Site visits in 2017 and 2021 the entire Site is vacant.

Note: Only information which may have environmental concerns regarding the Phase One Property are listed for further assessment.

Table 10: Summary Table of the Potentially Contaminating Activities ("PCAs")

Figure ID	PCA Number	Operations or Activities (Method)	Environmental Concern to the Site	Rationale
Location: Entire Site area				
PR1, SS1	30	Importation of fill material of unknown quality (as per previous report)	Low	- On-site - Previous intrusive investigation shows no exceedance in soil sample analysis;
Location: Former residential house area				
AP3	30	Importation of fill material of unknow quality (as per aerial photo)	High	- On-Site - Anticipated fill material from demolished residential house was not assessed during previous intrusive investigations
Location: 3330 Balsam Road – Approximately 70m northeast of the Phase One Property				
E1, AP2, SN1	40	Historically registered as pesticide operator (as per ERIS)	Medium	- Hydraulic up to cross-gradient to the Site
	52	Current industrial equipment storage facility (as per ERIS, aerial photo, site visit)		
Location: 2700 Audley Road North – Approximately 35m south of the Phase One Property				
AP1, CD1, SN2	40	Large-scale application of pesticides from operation of a golf course (as per aerial photograph, city directory and site visit)	Medium	- Hydraulically down to cross gradient to the Site - Close to the Site

Note: PCA numbers are in accordance with Table 2, Schedule D of O. Reg. 153/04.
#30 – Importation of Fill Material of Unknown Quality
#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems

Table 11: Summary Table of Areas of Potential Environmental Concerns ("APECs")

APEC	Location of APEC	PCA Number	Location of PCA	Figure ID	COPCs	Media Potentially Impacted
APEC 1	Former residential house area	30	**On-Site** Former residential house area	AP2	Metals, PAHs	Soil
APEC 2	Northwest corner portion of the Site	40, 52	**Off-Site** 3330 Balsam Rd	E1, AP1, SN1	Metals, PHC, BTEX, PAHs, OCs	Soil
APEC 3	Southwest boundary area of the Site	40	**Off-Site** 2700 Audley Road North	CD1, SN2	Metals, OCs	Soil

Note: PCAs described specifically for the Phase One Property with reference to the applicable item number in the Table of Potentially Contaminating Activities provided in Schedule D of *O.Reg. 153/04 as amended*, where applicable.

#30 – Importation of Fill Material of Unknown Quality

#40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems

The contaminants of potential concern ("COPCs") are listed as follows.

PAHs = Polycyclic Aromatic Hydrocarbon

BTEX = Benzene, Toluene, Etylbenzene, Xylene

PHCs = Petroleum Hydrocarbon

OCs = Organochloride Pesticide

Executive Summary: Summary By Data Source

CA - Certificates of Approval

A search of the CA database, dated 1985-Oct 30, 2011* has found that there are 1 CA site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key
	2944 Audley Road Ajax ON L1S 4S7	162.8	18

EASR - Environmental Activity and Sector Registry

A search of the EASR database, dated Oct 2011-May 31, 2021 has found that there are 1 EASR site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key
TRANS-NORTHERN PIPELINES INC./ PIPELINES TRANS-NORD INC.	ON	92.7	12

ECA - Environmental Compliance Approval

A search of the ECA database, dated Oct 2011- May 31, 2021 has found that there are 2 ECA site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key
Jaamiah-Al-Uloom Al-Islamiyyah Ontario	2944 Audley Rd Ajax ON L1S 4S7	162.8	18
Abdul Majid Khan in Trust	2944 Audley Road Ajax ON L1S 4S7	162.8	18

EHS - ERIS Historical Searches

A search of the EHS database, dated 1999-Jan 31, 2021 has found that there are 1 EHS site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key
	3225 Sideline 4 Pickering ON	0.0	1

GEN - Ontario Regulation 347 Waste Generators Summary

A search of the GEN database, dated 1986-Apr 30, 2021 has found that there are 8 GEN site(s) within approximately 0.25 kilometers of the project property.

Site	Address	Distance (m)	Map Key

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Apr 30, 2021

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-May 31, 2021

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Apr 30, 2021

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- May 31, 2021

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2021

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2021

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-May 31, 2021

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Apr 30, 2021

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2021

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-May 31, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Talent Huang:

RE: ***Freedom of Information and Protection of Privacy Act* Request**
Our File # A-2017-02168, Your Reference 17-1780GHE

The Ministry is in receipt of your request made pursuant to the *Freedom of Information and Protection of Privacy Act* and has received your payment in the amount of $5.00 (non-refundable application fee), along with your $30.00 deposit.

The search is being conducted on the following: 3225 Balsam Rd, Locust Hill (Lots 3 & 4, Con 5, Pickering). If there is any discrepancy please contact us immediately.

You may expect a reply or additional communication as your request is processed. For your information, the Ministry charges for search, copying and preparation time.

If you have any questions regarding this matter, please contact Jeneska Abano at jeneska.abano@ontario.ca.

Yours truly,

For Ja

Dear Talent Huang:

RE: ***Freedom of Information and Protection of Privacy Act* Request**
Our File # A-2017-02168, Your Reference 17-1780GHE

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 3225 Balsam Rd, Locust Hill (Lots 3 & 4, Con 5, Pickering).

After a thorough search through the files of the Ministry's York-Durham District Office, Investigations and Enforcement Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is $30.00 for 1 hour of search time @ $30.00 per hour. **We have applied the $30.00 for this request from your initial payment.**

To conduct a search through the files of the Environmental Approvals Branch requires an additional 8 hours. If you would like us to search for Environmental Compliance Approvals/Certificates of Approval at the Environmental Approvals Branch (EAB), please forward to me at the above address payment by money order or cheque (made payable to the "Minister of Finance (FOI)") or by credit card in the amount of $240.00. Please note that there is no guarantee any records will be located responsive to your request. Credit card forms are available on the Ministry's website http://www.ontario.ca/environment-and-energy/freedom-information-request-form-credit-card-form. Please note, a request for records must usually be answered within 30 calendar days, however Section 27 allows for time extensions under certain circumstances. If you choose to have the search conducted at the Environmental Approvals Branch, the time for answering your request will be extended for an additional 30 days.

When remitting payment please quote our file number or attach a copy of this letter.

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a $25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Kaitlynne Low at kaitlynne.low@ontario.ca.

Yours truly,

Janet Dadufalza
FOI Manager

TSSA record search for ten (10) properties around 3225 Concession Road 5, Pickering, ON (GeoPro Project No.: 17-1780E3)

Public Information Services <publicinformationservices@tssa.org> Mon, Jul 5, 2021 at 9:51 AM
To: Michelle Yu <michelley@geoproconsulting.ca>, Viktor Csath <viktorc@geoproconsulting.ca>, "env@geoproconsulting.ca" <env@geoproconsulting.ca>, Sinclair Kenrick <sinclairk@geoproconsulting.ca>, David Liu <david@geoproconsulting.ca>

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

NO RECORD FOUND

Hello Michelle,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses:

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationservices@tssa.org along with a fee of $56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Saara

PHASE ONE ENVIRONMENTAL SITE ASSESSMENT
INTERVIEW QUESTIONNAIRE

Date: June 23 2021

Site Location/Address:

Paul Bigioni

Personnel Interviewed:

Contact Information

Email: paul@grandhomescanada.com

Phone Number:647-892-1640

- What is the main purpose of this Phase One ESA? Development

Record of Site Condition (RSC) ___ Due Diligence ___ Other _____

- Years of working/living on the site: 4

- Briefly describe the Site and site operations:

Size of the Property: 17.9 Hectares

Size of Footing Area:

Year of Building(s) constructed: 1960 - building demolished

Nature of the business: vacant

Current Property Owner, and date of ownership: 869547 Ontario Inc.

Previous Property Owner: Frisque

Current/Previous occupants: none

PIN:

Assessment Roll Number:

Legal Description:Concession 5 S Lot 3,4 City of Pickering, Regional Municipality of Durham, also known as 3225 Concession Road.

- What is the property land use?

Current: vacant

Future/Proposed: residential lots

- Any chemicals were used or stored on site? Where? none

- Do you know any chemical spills that occurred on the property? If yes, what chemicals were involved? where and when did it (they) happen? How were they cleaned up? none

- How is waste water handled/stored/disposed on site? through city sanitary sewer system? no

- Were there any landfills/dumps/soil fill on site? no

- How are the solid wastes disposed of and where? none

- Are/were there any underground or above ground storage tanks on the property? If yes, where? were many years ago for the single residential unit.

- Are/were there any fluid-filled transformers or other electrical equipment on the property? Where? Any reports available for PCB content tested? no

- Are/were there any water wells located on site? where? yes

- What is the source of drinking water? none

- What is the heating/air conditioning system for the building(s)? none

- Are you aware of any lead paint, asbestos or urea foam insulation using for the building(s)?

- Are/were there any equipment maintenance/manufacturing/processing activities occurring on site? no

- Are /were there any hazardous wastes generated on site? Do you have a waste generator number? no

- Are you aware of any fires that happened on the property? no

- Are/were there any environmental issues/problems relating to the site, such as civic, criminal, or administrative proceedings or fines? no

- Have there been any occupational health and safety inspections conducted by regulatory agencies? Any findings? no

- Are there any building /site drawings available for review? no

- Do you know any geotechnical or environmental investigations taking place on the site? any reports available for review? no

- Do you have other contacts who you think can provide more information on the property?

Maurizio Rogato - planner

APPENDIX H

Phase One Property **Date: April 3, 2017**

Photo 1 – View of the entrance to the West Portion of Phase One Property (looking east). The Site has an address number of 3225 Balsam Road/Sideline 4.

Photo 2 – View of the West Portion of the Phase One Property (looking north).

Photo 3 - View of the approximate area of the former residential house (looking northeast).

Photo 4 – View of the south end of the West Portion of the Phase One Study Area (looking south).

Photo 5 – View of the Carruthers Creek and the outlying floodplains noted near the center of the Phase One Property.

Photo 6 – View of the floodplains of the Carruther Creek in the foreground and the east facing berm in the background in the West Portion of the Site (looking west).

Photo 7 – View of the temporary entrance to the East Portion of the Phase One Property from a new public roadway (namely Dexshire Drive) (looking south).

Photo 8 – View of the south property boundary of the East Portion of the Site with Dexshire Drive (looking west). A ditch and piles of the soil, fill, and could be seen near the boundary area.

Photo 9 – View of the East Portion of the Phase One Property (looking north). Water puddles were noted.

Photo 10 – View of stockpiles of gravel, sand and soil materials noted near the entrance of the West Portion of the Phase One Property (looking northeast).

Photo 11 – View of a pre-cast concrete cylinder object noted near the entrance of the West Portion of the Phase One Property (looking southeast)

Photo 12 – View of a water well noted in the northwest corner of the West Portion of the Phase One Property (looking southeast)

Photo 13 – View of a recreational vehicle parked near the location of the former residential house (looking southwest)

Photo 14 – View of a pool heater and filter storage area near the east edge of the West Portion of the Phase One Property (looking west)

Photo 15 – View of poorly drained area(s) noted in the West Portion of the Site

Photo 16 – View of soil stockpiles generated from two (2) excavated pits in the West Portion of the Site. A plastic storage tank was noted.

Phase One Property **Date: July 28, 2021**

Site Photo 1. Dirt Roadway in the Western portion of the Site. Photo taken facing east.

Site Photo 2. South western portion of the Site. Vacant land and wooded area noted. Photo taken facing south.

Site Photo 3. Northern Portion of the Site. Vacant land and wooded area noted. Photo taken facing northwest.

Site Photo 4. Eastern Portion of the Site. Vacant land and wooded area noted. Photo taken facing north.

Site Photo 5. Central portion of the Site. Heavily wooded area present. Photo taken facing east.

Site Photo 6. Area of formal residential house located in the western portion of the Site. Gravel present, no evidence of building structures or basements.

Site Photo 7. Piles of fill material and debris were noted in the western portion of the Site

Site Photo 8. Monitoring wells noted throughout the Site

Site Photo 9. Transformer located on a telephone pole in the western portion of the Site. No spills, staining, discoloration or leaks observed.

Site Photo 10. Underground water utilities present in the eastern portion of the Site

Phase One Study Area **Date: July 28, 2021**

Study Area Photo 1. Industrial Storage at 3330 Balsam Road. Photo taken facing west.

Study Area Photo 2. Alternative views of the Industrial Storage at 3330 Balsam Road.

Study Area Photo 3. Golf Course observed at 2700 Audley Road North. Photo taken facing west.

Study Area Photo 4. Ditches observed running along Balsam Road.

Study Area Photo 5. Wooded areas noted throughout the Study Area

LIMITATIONS TO THE REPORT

This report has been prepared in accordance with local generally accepted professional practices and procedures at the time of the assessment within the scope of Phase One Environmental Site Assessments under O. Reg. 153/04 as amended and is subject to the terms, conditions and limitations set out in our approved proposal prepared based on our understanding of the project requirements. As such, the assessment does not include any sampling or testing for potential contaminants such as asbestos, PCBs, radon gas, or airborne pollutants, etc.

This report utilizes scientific principles, professional judgement and subjective interpretations. This report herein comprises a statement of professional opinion based on visual observations, interviews and readily available documents only and the reader is advised that not all conditions that affect environmental compliance can be revealed by visual observations, interviews and readily searched documents.

Moreover, in the event that GeoPro has been granted authorization to use data and/or information obtained from previous third party investigation reports prepared by other consultants we make no warranty as to its accuracy or completeness and understand it to be factual and correct. As such, GeoPro does not guarantee the accuracy of said data prepared by others.

This report has been prepared for the exclusive use of the client and may not be relied upon by any third party without GeoPro's express written authorization. Unless otherwise agreed in writing by GeoPro Consulting Limited, it shall not be used to express or imply warranty as to any other purposes. No portion of this report shall be used as a separate entity, it is written to be read in its entirety.

The material in this report reflects our best judgment based on the information readily available to GeoPro Consulting Limited at the time of preparing this report. Any uses which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of such third parties. GeoPro accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report unless we are specifically advised of and participate in such action, in which case our responsibility will be as agreed to at that time.

The information provided in this report may not be sufficient to obtain approval for disposal of excess soil or materials generated during construction. Occupancy use, codes, rules, and procedures change rapidly with time in the environmental engineering field and the reader is advised to update the findings and recommendations on a regular basis.
