

Engineering Services Department

Expected Start Date: Thursday, July 11, 2024

Expected Completion Date: Friday, September 27, 2024

The City's contractor, Cardan Demolition & Excavation Inc. (Tender No. T2024-1) will undertake rehabilitation and sediment cleanout of the Rouge Stormwater Management Pond. This Stormwater Management Pond services the residential area located west of Woodview Avenue and north of CN railway as shown on the location map.

Prior to cleanout, contractor needs to utilize a pump to drain the pond's water. This pump needs to be running for about three weeks and that may include night hours as well. Knowing that this may cause some inconvenience, our contractor will be using a pump equipped with noise reduction generator, within an insulation panel and put it on low RPM during the night hours.

Maintenance is required to remove the sediment from the existing Stormwater Management Pond that has accumulated over the last 30 years and to undertake any necessary structural repairs and regrading works.

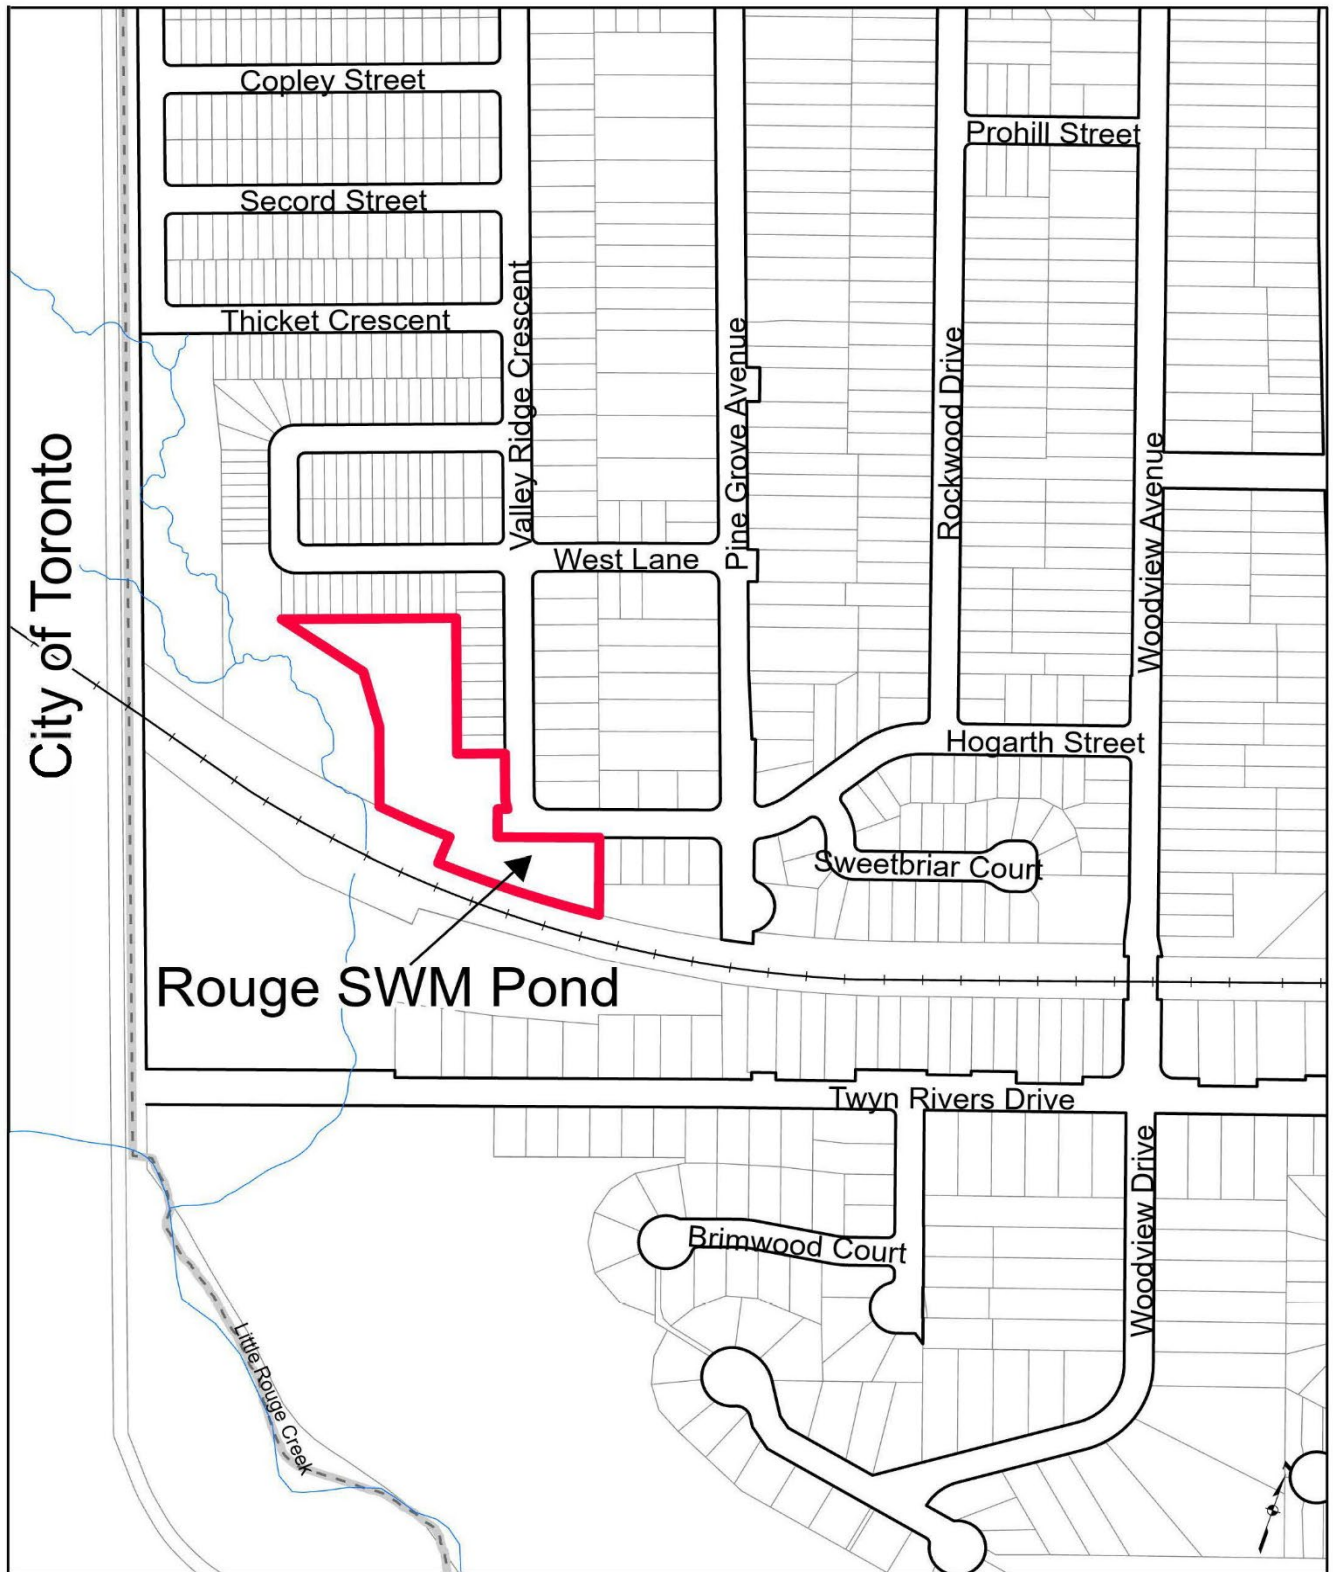

Retrofitting the Stormwater Management Pond allows for improved water quality, restored downstream erosion control and preserved ecological function.

If you require any further information regarding this project, please contact:
